

SCLIntra Solution Focus

Asset Tracking

SCLogic, LLC

Overview

SCLIntra helps organizations to define, track, manage, search and report on virtually any asset -- IT equipment, furniture, A/V equipment, software, engineering parts, art work and automobiles. The flexibility of the software allows users to define the item variable fields, the statuses of the tracking process and the information about the recipients or locations of assets. With SCLIntra, users can also collect, define, and update data through the Symbol Technologies SPT1800 Palm-computing device, providing unlimited mobility to track assets throughout the enterprise and offering complete update and reconciliation capabilities.

SCLIntra permits the management of all assets from one database. Using our browser-based query features, search from one piece of information or multiple pieces of information to find specific items or create broad reports. Clients can easily look up a single asset, how many of one asset the corporation currently owns, and what assets are in a current location or owned by an employee. Users can also quickly update asset history, record notes about the asset, and even record an electronic signature for confirmation of delivery.

Application

One SCLIntra user creates a unique barcode label for every item entering their warehouse. Once the barcode is created the item variable fields are used to define the item by manufacturer, model, description, lease expiration, color and condition. The asset is then assigned a shelf location in the warehouse. When an employee requests a particular asset, the asset barcode is scanned, the asset is placed in a status of 'delivered to recipient', the recipient's name is selected from the database and an electronic signature from the recipient is recorded for proof of delivery. The site manager says SCLIntra has substantially increased his operation's efficiency and enables his company to make better use of corporate assets because they know what assets they own, whether the assets are in use, and where to find them.

The screenshot displays the SCLIntra web application interface. At the top, there is a navigation bar with the SCLIntra logo and a menu of options: Sort, Recipient Options, User Defined Options, and Printing & Capture Options. Below the navigation bar is a toolbar with various icons for navigation and actions. The main content area is divided into several sections:

- Choose Status:** A dropdown menu set to "Inventory Check" and a text input field containing "CAVS".
- Asset ID (scan):** A text input field containing "MWP14121879571".
- Choose Owner/Destination:** A table with columns for Recipient and Location. Below this is a detailed table of recipients:

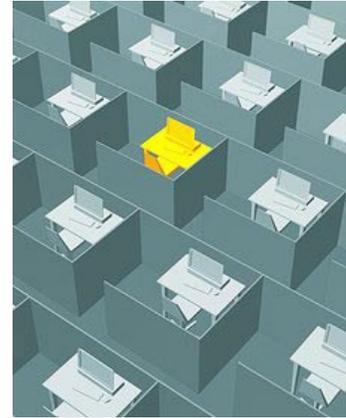

Name	Building	Route	Dept.	Phone	Ext.	Email Address	Cost Code	Su
Bird, Larry	1	1-B	Marketing	301-210-7400	333	bird@celtics.com	78	KC
Bruns, John	1	1-A	Education	410-883-9393	777	jbr@yankes.com	898	Joi
David, Ted	2	2-A	Sales	201-888-8833	3939	tdavid@cnbc.com	000	Bo
Hammann, Gordon	1	1	Sales	301-210-7400	224	ghammann@sclogic.com	12	Bri
Hoskins, Scott	2	2-C	Operations	301-737-0909	34	hoskins@db.com	23	Bo
James, LeBron	1	1-A	Operations	301-210-7400	999	james@scavs.com	765	
Jordan, Michael	2	2-A	Marketing	202-777-0909	233	jordan@mci.com	33	Ab
Little, Bruce	2	1-C	Sales	301-210-7400	227	blittle@sclogic.com	34	Mil

- Asset Information:** A form with dropdown menus for External Carrier (UPS), Model (AS 400), Manufacturer (IBM), Purchase Order (PO3345), Warranty (1 Year Full), Lease Expiration (12/1/06), Serial Number (AS212121), Software (Intra), Operating System (Windows 2000), and Condition (New).
- Notes, Signature, Snap Shot:** A section for recording notes and signatures. A note is visible: "ARRIVED ON TIME".
- Last Action:** A section for recording the last action performed on the asset.
- Buttons:** A set of buttons for "Add / Edit Items", "Main Menu", "Instant Replay", and "Clear Screen".

Benefits Snapshot

- Track the chain of custody of valuable corporate assets
- Proof of delivery through recording electronic signatures for high cost items
- Track depot repair cycles
- Report and search using department, model number, serial number, lease expiration date, description, employee, PO number, condition or any field needed for your operation. There are 20 user defined item variable fields.
- Record a digital image of an item's condition.
- Create an online catalog for users to search and view asset pictures
- Verify room or department inventories with the Palm device
- Track the operating system and software configuration on a computer for help desk assistance
- Export data from/to your Legacy system
- Produce a variety of reports:
 - Monthly lease expiration reports
 - Activity reports
 - Inventory level reports
 - Status reconciliation reports

About SCLogic, LLC

SCLogic develops, sells and supports the inbound receiving and tracking system, *SCLIntra*. *SCLIntra* uses barcoding technology to monitor and control the flow of tangible objects – mail, parcels, property, files or people – as they enter and move through a facility. *SCLIntra* is an affordable, flexible, IT-friendly solution that improves productivity by automating receiving, sorting and delivery processes while expanding tracking visibility across the corporate Intranet and beyond. SCLogic's accountable item solutions are licensed to hundreds of customers throughout the country.
