

# SCLIntra Solution Focus

## Courier Tracking

SCLLogic, LLC

### Overview

SCLIntra provides signature level accountability for couriers who pick-up and deliver traceable items – from legal or financial documents and files to laboratory samples or payroll. SCLIntra manages pre-assigned delivery routes and on-the-fly pickups and deliveries. Utilizing existing barcodes or preprinted labels, drivers track all movement of items from dock to dock and finally to the end recipient. For an item's every movement, drivers can scan a location barcode, capture a signature and enter comments.

### Benefits Snapshot

- Eliminates any and all gaps in accountability
- Provides online tracking services for customers
- All searches, reports, manifests and pick-up requests can be fulfilled online
- Produces a variety of reports:
  - Route management reports – volumes per route, route efficiency
  - Courier performance reports – driver deployment time, performance based on volume and elapsed time
  - Exception reports -- delivery verification for all items

### Application

One Dallas-based client uses SCLIntra to account for laboratory samples. Drivers log onto the Symbol Technologies SPT1800 delivery Palm, identify a location and time/date stamp responsibility for the samples. Next, drivers scan a delivery truck barcode and begin to scan samples onto the truck. Upon arrival at the delivery location, samples are scanned off the truck and a recipient signature is captured and/or a delivery location barcode is scanned. Drivers have the option of leaving a delivery receipt. The flexibility of SCLIntra means the customer determines the number of scans; there is no mandatory workflow.

### About SCLLogic, LLC

SCLLogic develops, sells and supports the inbound receiving and tracking system, SCLIntra. SCLIntra uses barcoding technology to monitor and control the flow of tangible objects – mail, parcels, property, files or people – as they enter and move through a facility. SCLIntra is an affordable, flexible, IT-friendly solution that improves productivity by automating receiving, sorting and delivery processes while expanding tracking visibility across the corporate Intranet and beyond. SCLLogic's accountable item solutions are licensed to hundreds of customers throughout the country.
