Delivering Accountability

SCLogic™

*Tracking Systems for Mail, Parcels, Files, Property or People!*

SCLLogic **and its network of certified business partners deliver innovative tracking solutions that leverage the latest barcode scanning, printing, mobile data collection and wireless technologies for business advantage. We write our own software, perform our own deployment services, staff our technical support lines, and train our customers face-to-face. We provide the hardware, assemble it ourselves and offer our own Hot-Spare service. This singular focus makes all the difference. So when it comes to in-house item tracking and distribution, it's no surprise that our flagship software engine, SCL***Intra*™**, delivers accountability — for anything, anytime, anywhere.**

SCL*Intra* Product Family

SCL*Intra* uses barcoding technology to monitor and control the flow of tangible objects—mail, parcels, property, files or people—as they enter and move through a facility. Designed for rugged, real-world applications, SCL*Intra* features intuitive user interfaces, simple hand-held data collection devices, intelligent routing and sorting, proactive email notification, signature capture and in-depth reporting. It allows any user to track any object, and monitor distribution, anywhere within your facility; yet it's flexible enough to adapt to the way your business already works. Simply choose the SCL*Intra* product that's right for you:

*SCL*Intra* supports compatible hardware such as MSR, RFID, webcams, printers, scanners, scales, and signature capture devices. The list is constantly growing!*

SCL*Intra* I-Box

SCL*Intra* I-Box, a stand-alone system designed for the volume of most users, is equipped with everything you need to be immediately productive. Typically placed and managed right at the point of use, **SCL*Intra*** I-Box can grow with you—just add portable delivery computers and additional workstations as volume grows.

SCL*Intra* Enterprise

A Microsoft® .NET Framework-based application, **SCL*Intra*** Enterprise is a network-installed system of software and hardware optimized for use on your corporate intranet. Used by companies who require multi-building visibility or 100% Web-served applications, **SCL*Intra*** Enterprise provides accountability across the campus or the world. With built-in wireless components and accessible through a browser anywhere on your network, **SCL*Intra*** Enterprise can be configured to track and report on any item as it moves throughout your organization.

SCL*Intra*™

SCL*Intra* Applications

Many clients who initially deploy SCL*Intra* **for package tracking soon realize there are a myriad of other applications that are a natural fit for a robust product of this nature. Simply put, SCL***Intra* **can use barcoding technology to monitor and control the flow of any tangible object—such as parcels, property, files or people— as they enter and move through a facility.**

The rugged Symbol MC9000 mobile computer speeds response by giving your employees timely access to the information they need to do their jobs faster and better.

Internal Delivery

From dock to desktop, **SCL***Intra* automates receiving, sorting and delivery processes while expanding tracking visibility across the corporate Intranet and beyond. Features include network level administration and security for mail accountability, integrated imaging features that allow users to store and/or email images of suspicious or damaged packages, specialized departmental charge-back tools, numerous internal pick-up request choices, extensive reporting capabilities, and hands-off interoffice mail management. Just scan and deliver with our IT-friendly solution.

Asset Tracking

SCL*Intra* helps organizations to define, track, manage, search and report on virtually any asset—IT equipment, furniture, A/V equipment, software, engineering parts, art work and automobiles. The flexibility of the software allows users to define the item variable fields, the statuses of the tracking process and information about the recipients or locations of assets.

Courier Route Management

SCL*Intra* provides signature-level accountability for couriers who pick-up and deliver traceable items—from legal or financial documents and files to laboratory samples or payroll. **SCL***Intra* manages pre-assigned delivery routes and on-the-fly pickups and deliveries. Utilizing existing barcodes or preprinted labels, drivers track all movement of items from dock to dock and finally to the end recipient.

File Tracking

SCL*Intra* helps clients define, track, manage, search and report on the movement of files within an organization. **SCL***Intra's* flexible interface allows users to customize their view using variable fields, monitor movement and report on information relating to ownership or current location of files. Using the Parent/Child relationship function, individual files can be boxed, moved and updated with just one scan.

Visitor Tracking

SCL*Intra* tracks the movement of visitors as they enter, move within and exit a building. Choose how you want to capture visitor information and let **SCL***Intra* do the work — record an electronic signature from the visitor, automatically add visitor information through a quick scan of their driver's license, or capture a digital image of your visitor with a Web camera. Store this information in the database or even print it out on the visitor's badge. Our sophisticated search engine allows clients to easily view visitor status and history and a host of other critical data.

Package Tracking Profile

SCL*Intra*™

Case Study: Automating Internal Delivery.

From the point at which a package lands on the receiving dock to the point at which it's delivered to the final recipient, **SCL***Intra* is in total control, every step of the way. This ensures 100% package accountability through the use of rock-solid process control, security and operational efficiency… all of which have a direct impact on your bottom line, regardless of your organization's size. Here's how easy it is to track packages with **SCL***Intra*:

Corporate Campus

TO: Alonso, Sandy (salonso)

Mailstop: 1
Department: DEV
Phone: 204

/2005 9:45:45 AM

External Carrier: FedEx
Model: 4412567
Manufacturer: GUSS Parts
Purchase Order: GUSS-4302

3 1014065469000

Automatically generate labels that contain all the essential delivery and routing information. Just scan, print and deliver.

Rugged handheld computers read inbound package tracking numbers, identify the carrier, date and time stamp receipts; plus count, record, and verify all packages as they are received.

A Simple, Speedy, Customizable Process.

1 Scan and Receive

Process up to 1200 packages per hour. Just scan carrier barcodes and automatically verify delivery counts.

2 Sort

Point and click to match each package with a recipient in the database. **SCL***Intra* addresses, routes, and prints labels for efficient delivery. If desired, create labels to make interoffice mail traceable.

3 Route

Pick delivery routes, HotSync® to move information on sorted packages to mobile devices, and send your team on its way.

4 Notify

SCL*Intra* automatically sends an email notification to each recipient, eliminating unnecessary calls and inquiries. You decide when and if these are sent.

5 Deliver

Deliver your way. Choose from dozens of proven desktop delivery options—signature capture, location scan, bulk deliver, alternate recipient, ID Badge scan, parent-child delivery and many more. Combine options to match your accountability needs.

One Size Fits All

SCL*Intra* **is scalable. SCL***Intra* **is affordable. And SCL***Intra* **is the only fully-integrated system built to run on your corporate intranet and capable of managing the entire delivery process. Regardless of whether you have a single facility or a corporate campus, SCL***Intra* **delivers:**

1 Greater Asset Accountability.

- Full chain-of-custody detail from receiving through delivery for inbound and interoffice packages.
- Self-service recipient delivery status through your corporate intranet.
- Scheduling and tracking of deliveries and pick-ups.
- Standard and customizable management and service-level commitment reports.

2 Tighter Process Control and Security.

- Reduced shrinkage and loss in the delivery chain.
- Effortless integration into your existing workflow.
- Flexible text fields make adding purchase order, RMA, serial and asset numbers a snap.
- Superior outbound control—coordinate outbound shipments with mail stop pick-ups; even connect with your shipping system.

3 Increased Operational Efficiency.

- High-speed barcode efficiency from the experts.
- Quick, logical courier routing.
- Uncomplicated screens and navigation.
- Improved service to internal customers.
- Measurable workload and efficiency reporting.
