

SCLIntra Feature Focus

Image Capture/WebCam

SCLogic, LLC

Clients can electronically record visual images into the SCLIntra Enterprise database with Symbol P304IMG or VS4004 scanners or any TWAIN compatible device, including most WebCams.

How it Works

Each time a package is sorted, users have the option to record an electronic image. SCLIntra's interface allows users to record a picture, view the quality of the image and record the image in the database tagged to that item. Searches on specific items will produce a picture of that item or event. Images may be retaken as needed.

Name	Route	Address	City	Phone	Current Route Order	Type
Abbas, Dennis R	12	6300 Samuel Blvd STE 154	Dallas	214-388-8898	001723	Call-In

Benefits and Uses

- Inbound Package Processing
 - Record damaged or destroyed items as they arrive on the receiving dock.
 - Send an image of a package to the end recipient along with their notification email.
 - Record an electronic image of the recipient when the package is picked up.
 - Record an electronic image of the delivery vehicle and license.
- Asset Management - maintain an electronic picture of all assets.
- People Tracking - record an electronic image of all visitors to a location.

About SCLogic, LLC

SCLogic develops, sells and supports the inbound receiving and tracking system, SCLIntra. SCLIntra uses barcoding technology to monitor and control the flow of tangible objects – mail, parcels, property, files or people – as they enter and move through a facility. SCLIntra is an affordable, flexible, IT-friendly solution that improves productivity by automating receiving, sorting and delivery processes while expanding tracking visibility across the corporate Intranet and beyond.
